

# The Utilities Group and Northern Cincinnati Chamber of Commerce

Partner with an offer for you

Energy rates are climbing and volatile. Today's economic and geopolitical atmosphere has infused such uncertainty into the markets – more than we've seen in years. Businesses still dealing with Covid protocols, staffing shortages, and supply disruptions don't need one more crippling hurdle. You need manageable energy costs and budget certainty.

The Utilities Group is an independent, unbiased energy advisory firm serving clients throughout Ohio and surrounding states since 1999. We work with the City of Sharonville and many of the Northern Cincinnati Chamber of Commerce companies to navigate energy choices. We'd like to work with your company, too. Let's talk market strategies, budget certainty, efficiencies and sustainability.

Chamber Members can receive a written complimentary electric and/or natural gas bill audit\*. Audit deliverables:

- Energy unit cost mapped against utility price
- Anomalies in usage
- Discrepancies or errors in rates and taxes
- Action items to reduce cost or consumption
